## 题目内容

Do you agree or disagree with the following statement? Friends should be able to disagree with each other and still maintain their friendship. Use details and examples to explain your opinion.

## 你的回答

yes i agree with the following statement we should disagree with each other and the friendship is very valuable

## AI 参考答案

I strongly agree that friends should be able to disagree while maintaining their friendship. True friendship is built on mutual respect, not uniform thinking. For example, my best friend and I have completely different political views, but we value our decade-long friendship more than being right. We engage in respectful debates where we listen to each other's perspectives without personal attacks. This actually strengthens our bond because it demonstrates that our friendship transcends superficial differences. Ultimately, friendships that survive disagreements are more authentic and resilient, as they're based on genuine acceptance rather than mere convenience.

## 问题与建议

☐ 问题: ['No clear stance', 'Lack of development', 'No specific examples']

☐ 建议: The response fails to meet TOEFL criteria: 1) Task fulfillment: While the student states agreement, the stance is unclear and contradictory ('we should disagree with each other' is not the same as 'friends should be able to disagree'). 2) Coherence and development: The response lacks any logical structure, supporting reasons, or progression of ideas. It's essentially one incomplete sentence. 3) Language use: The response is too brief (only 15 words) and lacks the required details and examples specified in the prompt. No specific vocabulary or complex structures are used.
