

TOEFL 口语 Task 1 评分报告: TP010 口语 Task1

题目内容

#1 Some people prefer to get information from books. Others prefer using a computer to access information via the Internet. Which do you prefer? Explain why.

你的回答

i prefer using a computer to access information via the internet because india have the internet have the large web data set so that we can gain more knowledge and can broaden our horizons for example if i watch a books like computer

AI 参考答案

I strongly prefer using a computer to access information via the Internet because it offers unparalleled convenience and breadth. For instance, when researching a topic like climate change, I can instantly access the latest scientific studies, news articles, and expert opinions from around the world. This immediacy allows me to stay updated in real-time, whereas books may contain outdated information. Furthermore, the Internet provides multimedia resources, such as videos and interactive graphs, which enhance my understanding. In contrast, books are limited to static text and images. Thus, the Internet's dynamic and vast repository makes it my preferred source for acquiring knowledge.

问题与建议

☐ 问题: ['Poor grammar and sentence structure', 'Lack of specific examples and development', 'Incoherent reasoning and unclear stance']

☐ 建议: The response fails to meet TOEFL criteria due to severe grammatical errors (e.g., 'india have the internet have the large web data set'), which hinder clarity and coherence. The reasoning is underdeveloped and lacks logical flow, with the example ('if i watch a books like computer') being unclear and irrelevant. Additionally, the response does not sufficiently explain why using a computer is preferred over books, missing key elements like specific advantages or personal experiences.

推荐短语

unparalleled convenience; breadth of information; enhance understanding; dynamic repository; stay updated in real-time

推荐句型
